

# Country Manor Shake

## Durable Wood Shake Beauty

Country Manor Shake offers your home the charming beauty of real wood shakes without the problems traditionally associated with them. It's an investment in the aesthetic and financial value of your home. Neighbors and passersby alike will be sure to admire this lasting investment in your home's beauty and value. Because it's made of the highest quality materials, Country Manor Shake always looks like new—upholding its beauty and the value of your home.

## Interlocking Protection

Ordinary roofing relies on overlapping and short-lived sealants for weather resistance. Country Manor Shake, however, is a completely interlocked roofing system. Our shingles lock together on all sides to form a weather tight seal on your home for unbeatable wind resistance and protection. It has been approved by building codes in some of the toughest coastal areas, and tested to withstand 110 mph wind-driven rain as well as 90 Pounds per Square Foot uplift.

## Metal Roofing Provides Fire Safety

Brush fires, fireworks, even sparks from a chimney pose a threat to many homes. While fire-resistant products like tile and slate won't burn, their great weight means a huge risk of a roof collapse. In fact, firefighters are trained not to enter a burning building with a tile roof because of this added danger. Country Manor Shake, however, is crafted from fireproof, lightweight aluminum (just 50 lbs per 100 square feet). This superior combination of light weight and non-combustible metal means lasting protection for your home and family.

## Kynar 500/Hylar 5000 Finish

The incredible Kynar 500/Hylar 5000 finish is specified by industry experts when they need the ultimate in lasting exterior building products. This finish is unmatched for resistance to the fading, peeling, curling, and cracking that plague other materials. More than an ordinary paint, this is a tight molecular bond that holds the color true and protected for decades. The Kynar 500/Hylar 5000 finish is one of the reasons Country Manor Shake is protected by such a strong warranty.

## HI-R Heat Barrier Coating

Country Manor Shake roofs are coated with HI-R heat reflective paint, which helps to create a cooler, more energy-efficient home due to the special reflective pigments embedded in the finish. The complex chemical structure of these pigments reflects away the infrared portion of the sun's rays most responsible for heat buildup. So, while maintaining color consistency and fade protection, HI-R Heat Barrier Technology provides all the advantages of greater reflectance, without sacrificing color choices.

# Rustic Shingle

Rustic Shingle is an investment-grade metal roofing system that provides beauty, protection and increased value for your home. If you look closely at Rustic Shingle, you will see a rugged texture and deep realistic wood grain that replicates wood shake shingles. However, unlike real wood, Rustic Shingle will never split, warp, mold, or rot. With Rustic Shingle, you will not need routine maintenance or replacement.

## A Roof With a History of Beauty and Value

For over 50 years, Rustic Shingle has been protecting and adorning homes around the world. With a new palette of tasteful and elegant colors, Rustic Shingle added tough lifetime protection with historic beauty. Today, Rustic Shingle is a perfect way to protect your beautiful home.

### Beautiful

- Available in a variety of fade and chalk resistant Kynar 500/Hylar 5000 colors
- Concealed fastener system for a clean finish
- Rugged texture with realistic wood grain
- Maintenance free: will not rust, crack, or rot
- Resists streaking and staining
- Never needs cleaning

### Environmentally Smart

- Energy Star Partner
- Cool colors featuring hi-R reflective pigments
- Reduces heat gain, which leads to energy savings
- Made from 98% post-consumer recycled aluminum
- Can usually be installed over existing roofs, reducing landfill burden

### Strong

- Passed UL 580 Testing, which simulate wind at over 200 mph
- Passed UL 2218 Class IV, the highest rating for impact resistance
- Will not burn and protects against flying embers from wildfires or chimneys
- Four-way interlocking connection system

### Durable

- Will not absorb water and become waterlogged
- Will not rot or support insect infestation
- Lifetime Limited Warranty

# Clicklock Standing Seam

## ClickLock Standing Seam: Specialty Traditional Metal Roofing

ClickLock Standing Seam provides a clean, contemporary look that is architecturally scaled for residential applications. Manufactured from heavy-duty, rust-free aluminum, ClickLock stands apart from most standing seam panels that are steel. Additionally, in comparison to most panels, ClickLock has all concealed fasteners, eliminating failure-prone rubber washers beneath exposed screw heads.

### Beautiful

- Available in many fade-resistant colors
- Concealed fasteners for a clean and tailored look
- Tall 1-3/4" seams for added distinction
- Maintenance free: will not rust, crack, or rot
- Resists streaking and staining
- Never needs cleaning

### Environmentally Smart

- Reflective Pigment coatings keep attics naturally cooler, cutting energy costs
- Made from 95% post-consumer recycled aluminum
- Can usually be installed over existing roofs, reducing demand on landfills

### Strong

- Will not burn and protects against flying embers from wildfires or chimneys
- Positive "snap lock" connection between panels

### Durable

- Will not absorb water
- Will not rot or support insect infestation
- Limited Lifetime Warranty

For homeowners who want a metal roof with a traditional appearance, or require special architectural considerations, ClickLock is designed to be the best. The stainless fastening clips and screws ensure secure and lasting attachment with no chance for problems resulting from expansion and contraction. The trims used to complete a ClickLock roof have also been carefully designed for beauty and durability. Produced with precise tolerances under controlled conditions, and using only the best first-run aluminum and quality Kynar 500 or Hylar 5000 coatings, ClickLock is truly top-of-the-line standing seam roofing for your home.
